## Plain Bob Minor

To ring more than 60 unique rows of Plain Bob Minor, you need to add *calls*. If the conductor says "Bob" or "Single" just before a lead-end, the bells obey a different rule instead of the normal lead-end rule. At a Bob, instead of someone making 2nds, someone makes 4ths and then reverses direction, and the bells in 2nd and 3rd places run straight through without dodging. At a Single, the bells in 2nds, 3rds, and 4ths places each make a place and reverse direction. Both calls shuffle the bells so that you can go farther without repeating; with enough of them in the right places, you can ring all 720 possible rows.
